

GLOBAL ACCOUNTING

The world economy is moving towards global accounting standards, so it is important that your business is compliant with these regulations and up to date with the standards in all finance and accounting processes.

This results in more efficient, streamlined, and comprehensive financial statements. It also helps attract global opportunities, resulting in greater profits.

Global accounting services make it easy to provide financial reports to clients from different countries or for multinational companies operating in multiple companies. This also helps to promote a more robust financial economy globally.

Vee Technologies provides IFRS/GAAP/IAS standards of global **accounting** for the following processes:

- Accounts receivable
- Accounts payable
- Accounts taxation
- Accounts VAT
- Accounting bookkeeping
- Annual accounting
- Bank reconciliation statement
- Daily ledger entry management
- Financial accounting services
- International recruitment processing
- Management accounts
- Payroll timesheets processing
- Sales tax management
- Tax return preparation
