A Guide to
"Eco-Friendly Living"

01.

Recycle everything

If you want to be a better eco-friendly environment then recycling is the best way of achieving this by recycling all the waste that falls everywhere.

02.

Try to cut out plastic

Just try to cut out plastic by using a canvas bag when you go shopping which will recycle after use, buy your fruit and veg loose, and stop buying bottled water.

03.

Fix it, don't throw it

Repairing or fixing things is more valuable and environment friendly than simply throwing those things anywhere, although the latter may seem simple and cheaper sometimes.

04.

Don't drive

During driving, always make sure that you get the most out of your vehicle by keeping the speed down, ensuring tires & vehicle condition properly, and that the engine is running smoothly.

05.

Compost

Composting takes an effective role in helping to create a natural fertilizer and keep your garden green as well as reduce the amount of waste going to landfill.
