

ALTA SURVEY COST

An ALTA Survey can be compared to a combined full boundary and topographic survey along with all planning data.

An ALTA survey will meet all national standards developed by ALTA/ACSM. Comparable to an SRPR, ALTA surveys show everything within five feet of the boundary lines including fences, walkways, driveways

any easements, rights-of-ways, encroachments and any other elements that may affect the property

We provide quality ALTA surveys that will meet all national standards.
