

# BENEFITS OF LAUNCHING IDO DEVELOPMENT SERVICES

01

## INSTANT TRADING:

The tokens created for IDO can be immediately traded the moment they are launched. It enables investors to purchase them at a low cost and sell them at a high price and thus, increasing the value of the token.

## LIQUIDITY:

It refers to the ability to buy and sell tokens in the market or quickly change your digital assets. The instant buying of IDO tokens can help in an immediate hike in the price of tokens which can help earn profit.

03

## OPEN FUNDRAISING:

With IDO, fundraising becomes somewhat easy. You need not rely on the centralized exchange and permission to initiate a fundraising program. This helps you unlock fair and open fundraising opportunities.

## COST-EFFECTIVE:

It provides a cost-effective token sale with the help of self-executing smart contracts, which helps eliminate the participation of the third party.
