

5 Features of Custom Display Boxes

ENVIRONMENTALLY FRIENDLY

The best way to create an eco-friendly **custom display box** for your product is to choose one made of ecologically sound cardboard with a black overprint using biodegradable soy ink. The materials are carefully chosen to ensure maximum protection and minimal weight.

• VERSATILE KRAFT DISPLAY BOXES

The best way to create an eco-friendly custom display box for your product is to choose one made of ecologically sound cardboard with a black overprint using biodegradable soy ink. The materials are carefully chosen to ensure maximum protection and minimal weight.

• STURDY & DURABLE

Custom display boxes are also sturdy and durable, making them perfect for product packaging, especially for eCommerce. They can also be recycled, making them a good solution for the environment. They are usually made from cardboard, which is environmentally friendly.

• CUSTOMIZATION OF DISPLAY BOXES

Custom Display Boxes can be made of one or several colors, or four-color process printing. In addition to the size, boxes can feature different closure styles, including magnetic, ribbon-tied, and interlocking styles. Some even feature tuck-tab closures to help your customers keep your products secure.

• HOLOGRAPHIC PRINTING

Custom Display Boxes incorporating holographic printing is an excellent marketing tool for your business. The process of holographic printing is easy and quick and can boost your company's business with stunning results. To create the best holograms, you must use the proper process and materials.
