

About Guanglijin

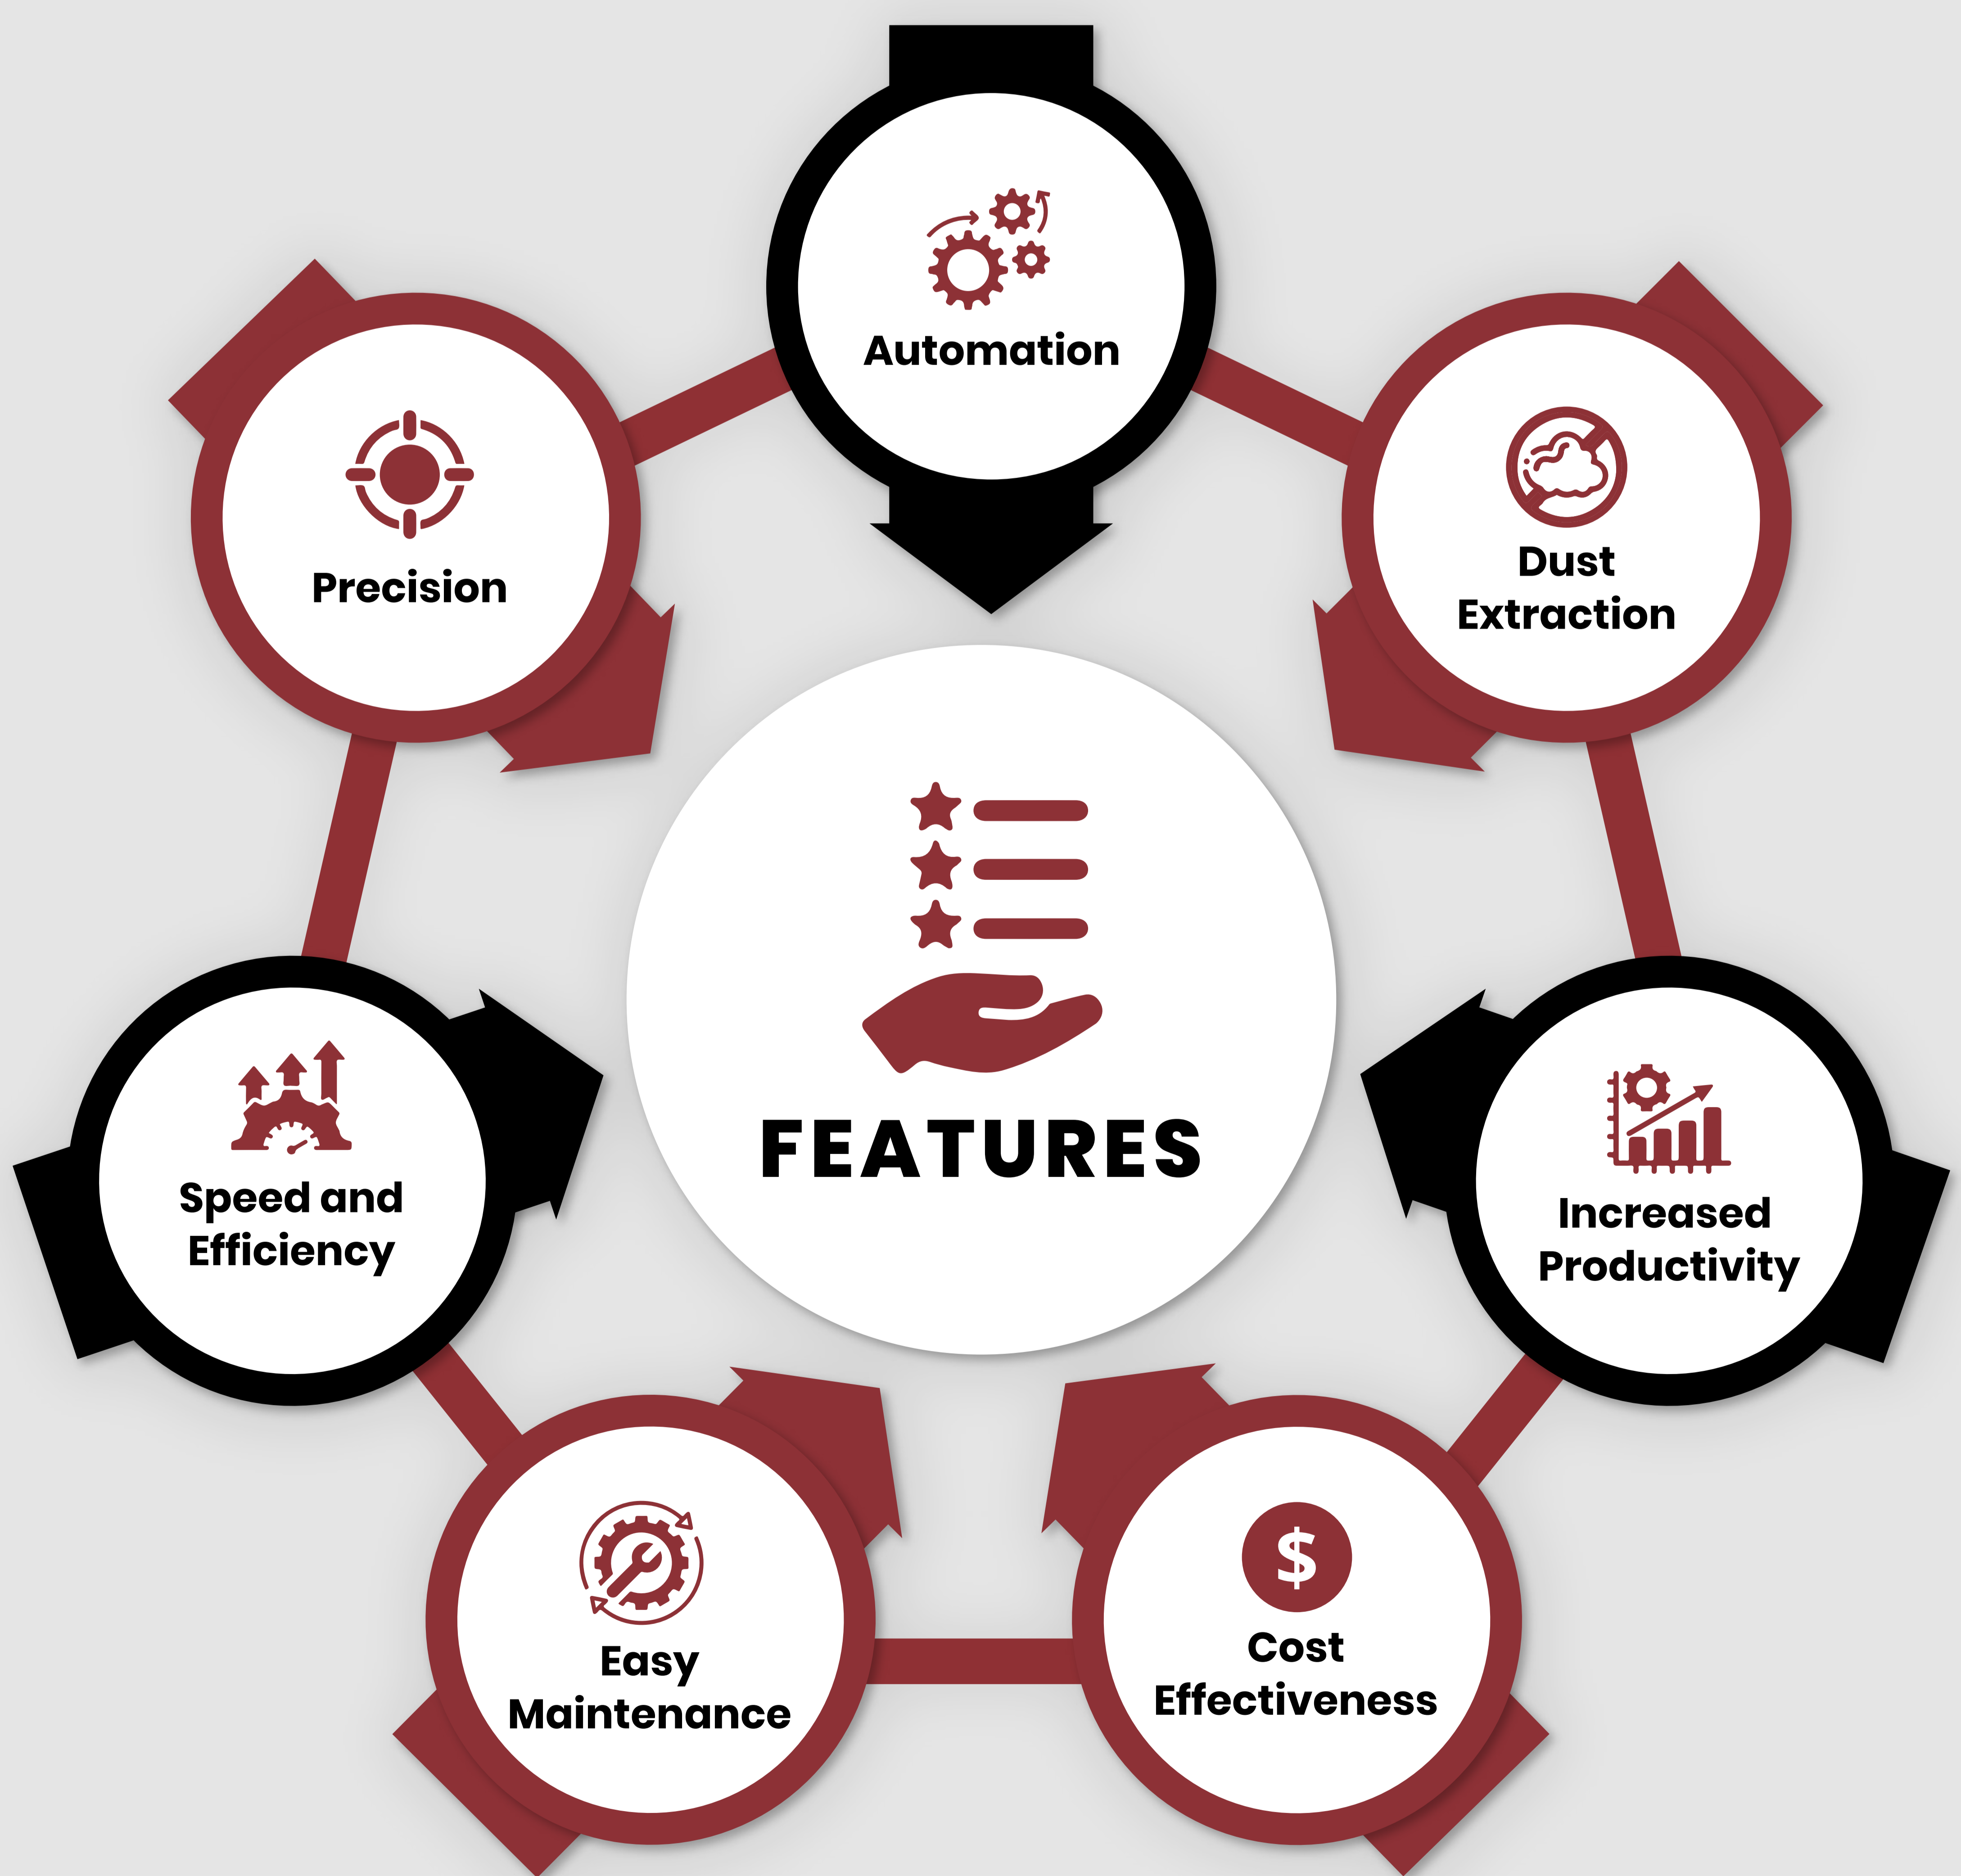

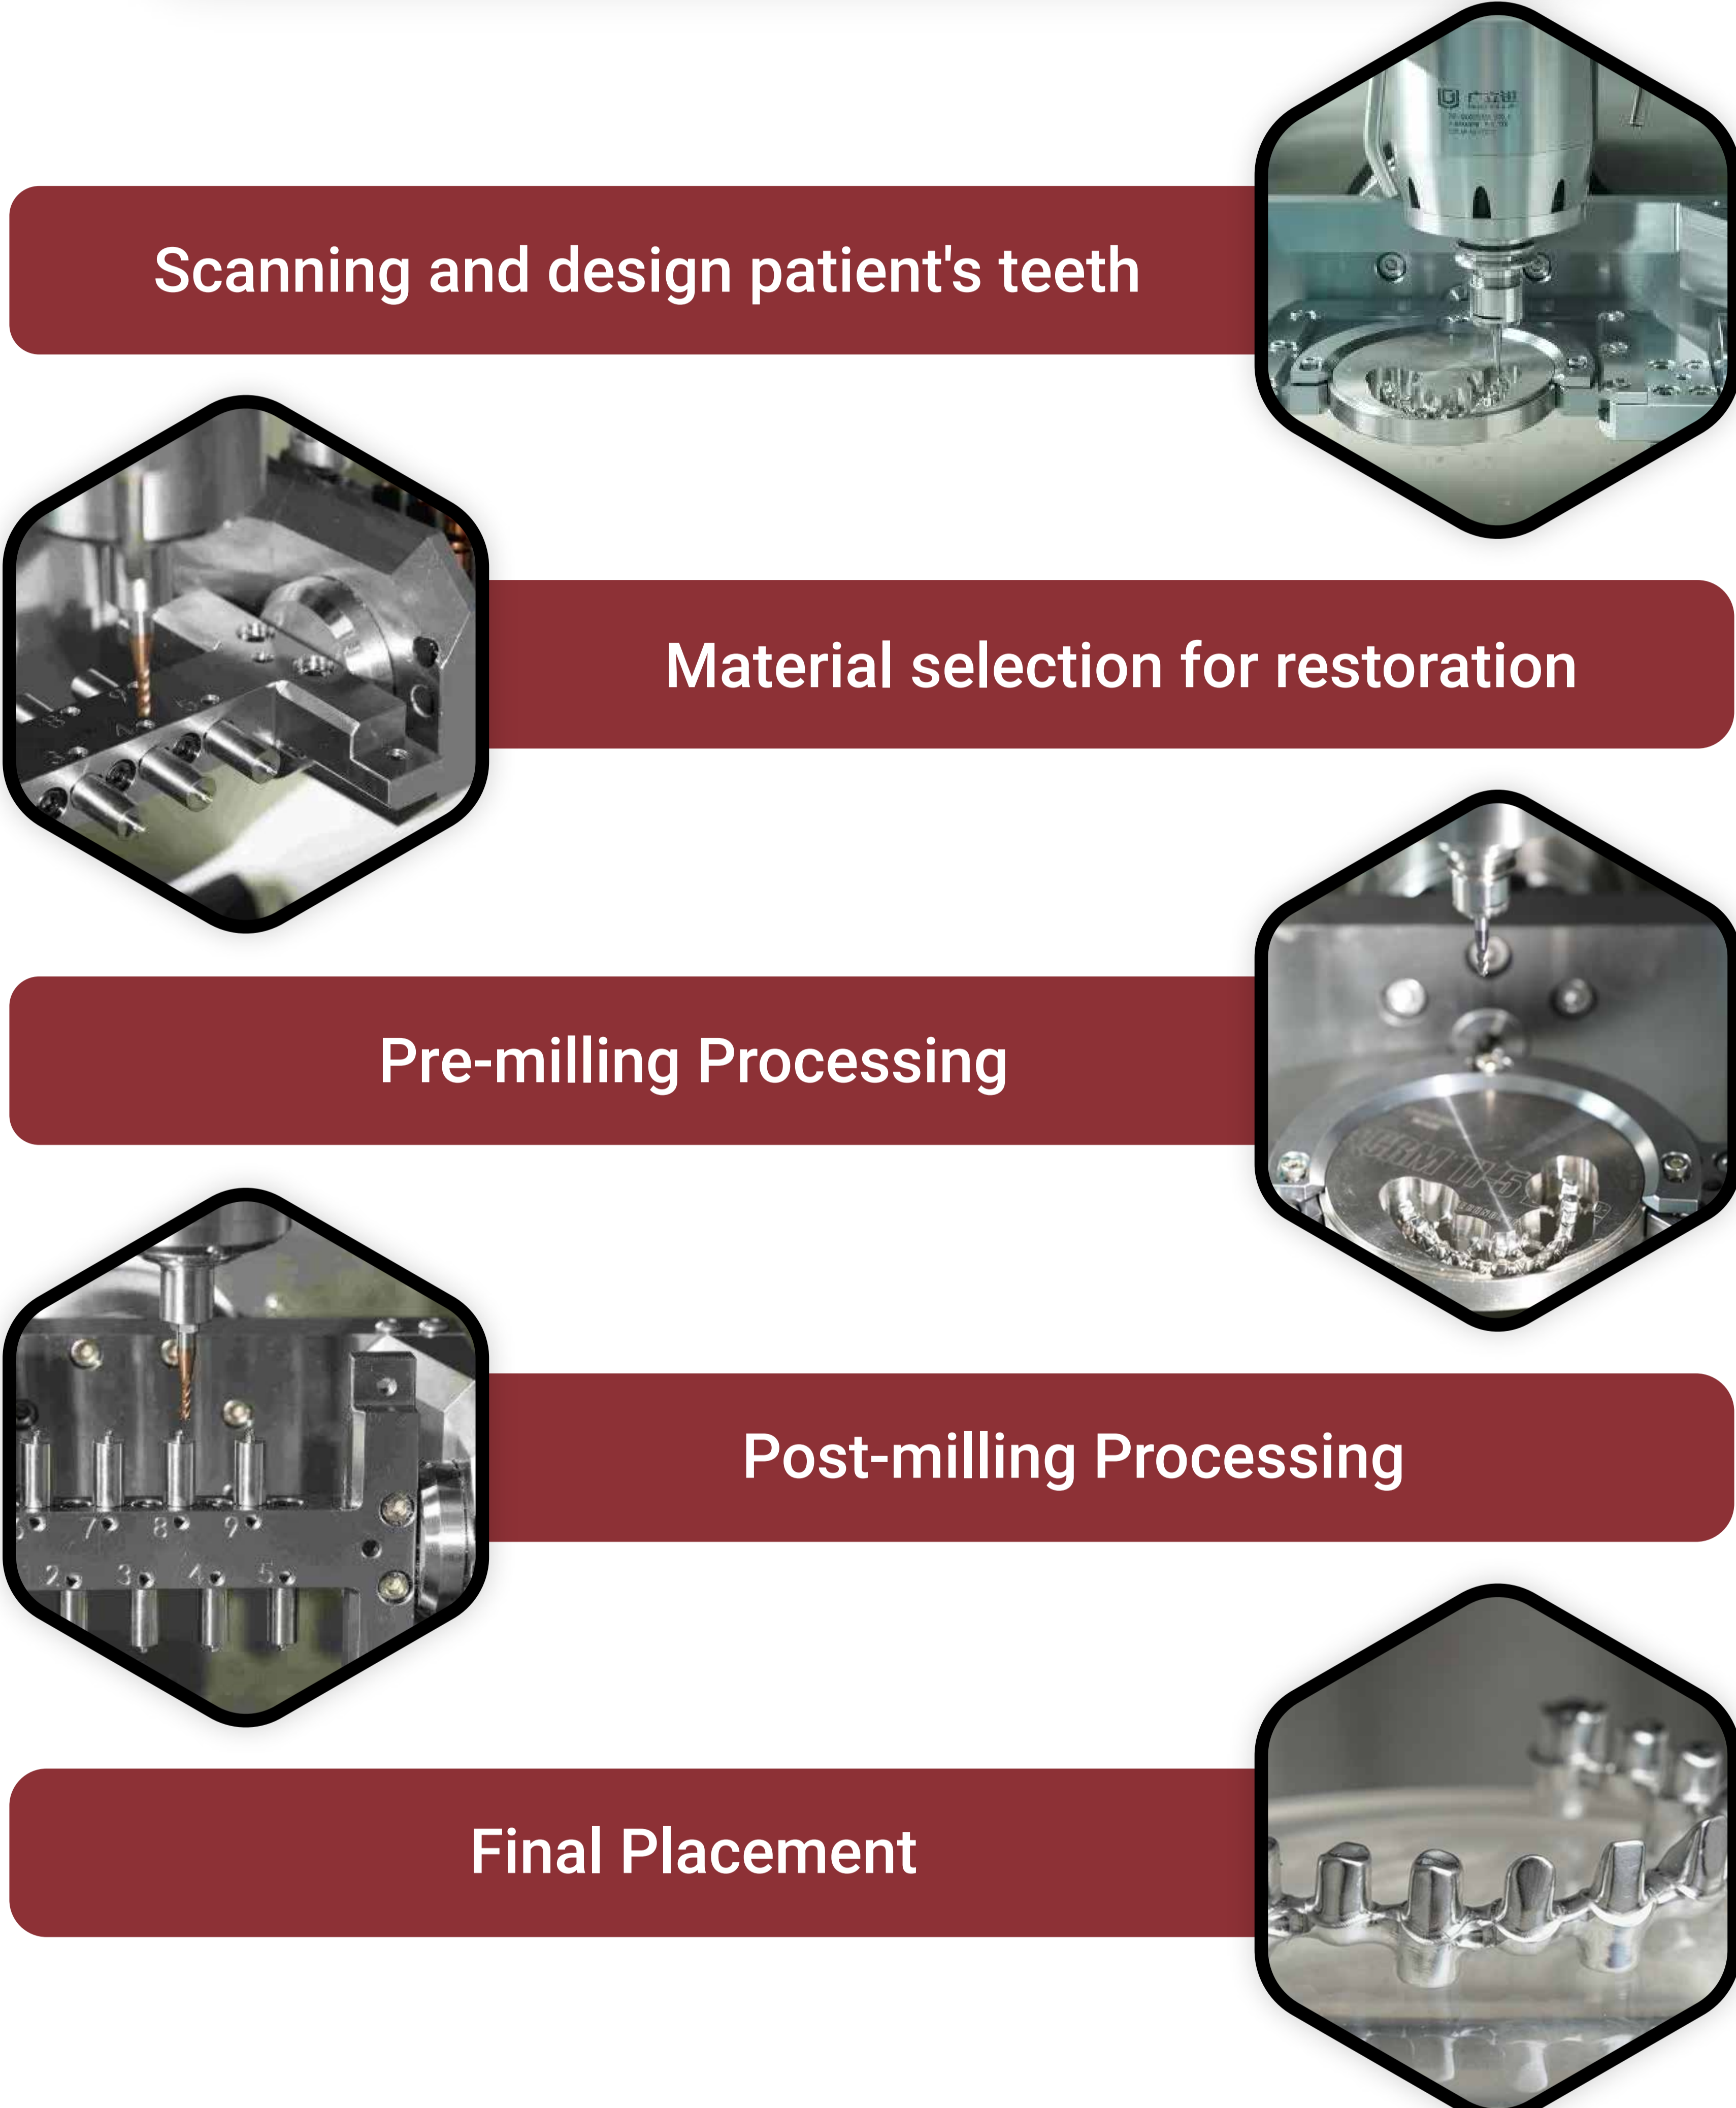

We are a renowned manufacturer of CNC processing equipment for Jewelry Engraving machines and Dental Milling machines. Our company, established in 2004, has formed partnerships with over ten strategic partners. We have production, education, and research bases with well-known universities and a team of more than 200 experts who provide comprehensive services to our customers.

DENTAL MILLING MACHINE -DENTAL LAB

A dental milling machine is a computer-controlled device used in dentistry to fabricate dental restorations, such as crowns, bridges, inlays, and onlays. It uses rotary cutting tools to remove material from a block of material and create a customized restoration.
