

Niche FPP offers the most unique and best products!

FPP products are manufactured using the finest corrosion-resistant fluoropolymers.

The impact of Niche FPP in the chemical manufacturing and processing industry!

Niche FPP is the pioneer and most established producer of fluoropolymer heat exchangers used in crucial semiconductor manufacturing processes, chemical processing, metal finishing, and the manufacturing of acids and bases.

Niche Fluoropolymer promises Heat Exchangers with low maintenance costs and exceptional service life!

By using our heat exchangers consistently and with good performance, thousands of customers throughout the world experience lower operational costs. Niche FPP employs higher-quality materials to save costly unanticipated downtime and replacement expenses.

Niche FPP always promises higher purity products!

The best PFA fluoropolymer resin is used to assemble ultrahigh-purity heat exchangers, which enable manufacturers to meet the stringent purity requirements. Fluoropolymer manufacturers who produce high purity chemicals can maintain the quality that industry demands.

Niche FPP proudly offers the industry's leading quality of fluoropolymer tubing!

Fluoropolymer tubing from Niche FPP is made to withstand extreme corrosiveness and ultra-high purity at a variety of temperatures. Excellent quality fluoropolymer tubing is offered in custom lengths.
