

# SPEAKER STAND DESIGN OPTIONS

## SINGLE POST SPEAKER STAND

Single Post Stands are a good choice for when you want a performance stand for a high-value or secondary system.

The Sound Anchor Single Post Stands will support speakers with bases as large as 10" wide x 12" deep and can be made in heights up to 30". These stands are available with 3 or 4 spiked feet.

## THREE POST SPEAKER STAND

Three Post Stands are a good choice for when you want more performance than you can get from a single post monitor stand. Sound Anchor Three Post Stands are made for music lovers and provide performances that will not disappoint. Three-point stands are easier to level on uneven floors than 4 point stands. These stands can be custom-made to fit almost any speaker.

## FOUR POST SPEAKER STAND

If you are setting up a statement-type system with expensive speakers, electronics, and cables you will want to hear every tiny detail. Sound Anchor 4 Post Stands are for the audiophile who enjoys listening to the details. These stands are heavy and have a large footprint making them very stable. These stands can be custom-made to fit almost any speaker.

## ADJUSTABLE SPEAKER STAND

Adjustable Monitor Stands are rigid and heavy. They were designed for studio use and can be found in many of the world's most famous music, film and broadcast studios. From a performance, stability and price standpoint they fit right between our 3 and 4 post monitor stands. They are available in sizes to fit small and medium sized monitors. They are height and tilt adjustable from 6" to 56".
