

HOW TO PLAY LUDO ON 3PLUS GAMES

www.3plusgames.com

Ludo is a strategy-based board game where the given moves and the player's decisions decide how far the given four tokens would go. To start rolling the dice with the 3Plus Ludo game, first, you have to download the 3Plus app from our website www.3plusgames.com. Both 2-player and 4-player contests are given in the app. Choose your choice of game and start playing Ludo online with friends.

The main objective of 3Plus Ludo is to score maximum points with the given moves. The points are given with the cumulative number of steps that the player's pawns have moved along with how much the opponent's pawns are captured. In 3Plus Ludo game, each player is having 24 moves of their own which are visible to them from the start. Every player will have the same set of numbers that are randomly generated. That means, in the 24-move game, numbers 1-6 are randomly generated 4 times in the game. During their turn, the player can choose which of their pawn/token to move. With the moves given earlier, one can plan their moves properly to play a safe game, protecting their pawns.

A player will have 4 pawns in the game, and they can move only 1 pawn during their turn. 10 seconds will be given to complete a move. If you are failed to complete the move at the given time, the move will be lost. If a pawn is moved to a square where the opponent's pawn already stands, the existing opponent pawn will be eliminated to the home area. If you knockout the opponent's pawn like this, you will get an extra move. Also, if you can move your pawn to a square where one of your pawn stands, the square gets blocked and no one can knockout your pawns from there.

Furthermore, there are safe squares in each quadrant of the Ludo board game that are marked with a star. Players can destroy the pawns anywhere on the board besides these safe areas. Also, when a pawn reaches its coloured area or home column, it will be safe. When a pawn goes all the way down its track, from the beginning to the assigned coloured home region, it enters the home column. The one who reaches the final position will get an extra move and extra points.

Welcome to the exciting world of Ludo, the timeless classic game that has been enjoyed by millions of players for generations. **With 3Plus Ludo game**
