

# Snakes And Ladders Rules

- The game requires two to four players to play along with a reliable internet connection.
- Each player is given three game pieces to play, which they must navigate from the first to the last square within the given 24 moves.
- The game piece will fall down the snake's tail if it lands on the snake's head.
- The points given are calculated through where your game pieces are situated. The sum total of the numbers where the pieces are positioned is considered the total score.
- The opponent's game pieces can be eliminated if your game pieces land in the same position as theirs. Hence you will get an additional move and the opponent lose points. If you knock out the opponent's game piece, an extra move will also be given.
- Once you reach the final column, an extra 50 points and an extra move will be given additionally.
- 14 seconds are given for a user to complete their move along with 3 lives.
