Testimonials

"The best **Proactive** plan, when faced with a problem, is to create a few minutes pause and ask yourself what you value in each of the involved. Then, armed with this appreciation, redefine the problem so it becomes an opportunity consistent with your Values, Commitments and Principles. Using this approach, construct a plan that captures the opportunity."

Valerio Pascotto, IGEOS

"Current collective morality makes us believe that the important thing is to win. We must rebuild our honorable and compassionate **Human** society where competition is being eliminated. Remember, you don't have to be stronger than the other. You must be stronger than yourself thanks to the other."

Albert Jacquard, geneticist
