

## ❁ PARIJATA FLOWER - NIGHT FLOWERING JASMINE

This plant loves to grow in direct sun light. Place the plant in bright light place.

Frequent watering is essential for few weeks after planting, especially the plants are taking root.

Application of organic fertilizer vermicompost around the plants of about monthly once.

Parijata flowers have four to eight petals arranged above a vibrant orange tube in a pinwheel pattern.

Arranged in opposite, broad with sharp margins.

Well-drained, moist & well-aerated fertile soil.
