

Thunbergia requires direct sun light with partial shade.

Keep the soil moist by regular watering.

Application of any organic compost such as FYM, vermicompost helps to grow plants bushier.

# THUNBERGIA

Flowers are feathery with white, black, yellow centric. Flowers colors varies depending up on the varieties.

The Bush clock vine plant loves to grow in well-drained soil rich in organic matter. Avoid growing thunbergia in heavy clay soil.

Potting Mix- Garden soil+30-40% compost +steamed bone meal +20% of cocopeat if needed alone.
