

# 7 BEST AIR PURIFYING INDOOR PLANTS

## ALEO VERA

Aloe vera not only has soothing properties for your skin but can also help clear the air of formaldehyde and benzene

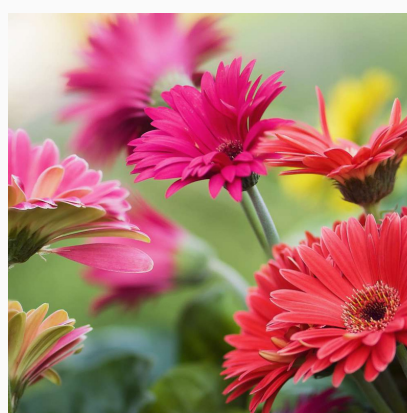

## BOSTON FERN

Boston ferns are excellent at removing pollutants like xylene and formaldehyde. They thrive in humid environments

## MONEY PLANT

The plant effectively filters out benzene, formaldehyde, trichloroethylene, xylene, and toluene from your home and gives you rich oxygen-filled air. This indoor plant grows well in the summer.

## GERBERA DAISY

These colorful flowers can brighten up your space while removing trichloroethylene and benzene.

## PHILODENDRON

This is another outstanding low-light plant that must feature in the category of air-purifying plants. This plant clears formaldehyde from the surrounding environment.

## PEACE LILY

Peace lilies are known for their elegant white flowers and their capacity to remove ammonia, benzene, and formaldehyde from the air.

## PEPEROMIA

This indoor plant grows fastly and easily in indirect bright light or artificial lighting conditions. This requires frequent watering, but we are sure that you will get bowled over these plants.
