

# 5 TYPES OF DRUG TESTING

*A drug test looks for signs of one or more illegal or prescription drugs in a sample of given below*

## 1 HAIR

Hair drug test collects small strands near the scalp (back of the head) to screen for drug use without visible signs.

## 3 URINE

Blood drug tests detect drugs within minutes to hours (versus days in urine) using immunoassays with definitive testing.

## 2 BLOOD

Fill container to marked level, then finish in the toilet. Painless urine drug test, might cause anxiety.

## 5 SALIVA

Directly observed oral fluid collection prevents tampering. Donor uses sealed device, collector transfers to lab tube.

*These are the ways to collect sample for drug testing.*
