

# House cleaning tips

## 1. Declutter First:

Begin by removing unnecessary items and organizing your space. A clutter-free environment makes cleaning more effective.

## 2. Top-to-Bottom Approach:

Clean from high areas like ceilings and light fixtures down to lower surfaces and floors. This prevents dust and dirt from falling on already cleaned areas.

## 3. Target High-Touch Surfaces:

Pay special attention to frequently touched areas like doorknobs, switches, and remote controls. Regularly disinfect these to maintain a healthy home.

## 4. Consistent Cleaning Routine:

Establish a cleaning schedule to tackle tasks regularly, ensuring your home stays clean and inviting.
