

MEDICAL TESTING SOLUTIONS

WELLNESS TESTING SOLUTIONS

Transform your workplace with on-site wellness testing from My Care Labs. Our expert team offers comprehensive testing for a healthier workplace. Improve employee wellness and productivity with our convenient and accurate testing solutions. Click on Learn More for more details.

TOXICOLOGY TESTING

In light of HR managers' need to recruit and retain top talent, My Care Labs will offer drug testing for businesses and other organizations in Spring 2023. Drug testing is also applicable to hospitals, clinics, schools, prisons, and rehab care homes. Therapeutic drug monitoring is the other side of the drug testing coin. It is important to check patient success or compliance with therapeutic pharmaceutical drugs in nursing homes, schools, psychiatric care facilities, and other settings.

INFECTIOUS DISEASE TESTING

My Care Labs was founded during the COVID-19 Pandemic. We provide fast, simple, accurate infectious disease testing. At present we offer smart combo COVID-19 + RSV/ + Flu PCR tests with same-day or 24-hour results, dependent on California testing location. Our patient services are no-cost with insurance.

ONCOLOGY TESTING

Oncology Testing: My Care Labs offers patient services at no-cost with any health insurance plan. Why not expand our testing to include cancer screening? We will screen patients for various cancers starting in Winter 2023.
