

## Why Data Security Manager SaaS?

IT infrastructure is migrating to the cloud—and how! Most businesses are either already running on the cloud or in-transition to it. If numbers are to be believed:

61%

of businesses migrated their workloads to the cloud in 2020.

81%

of all enterprises have a multi-cloud strategy (and not in the works).

67%

of enterprise IT executives is cloud-first.

However, there's one more reality we can't ignore.

Cloud-based environments (security) still belongs in the context of operations. The top three most security concerns these organizations receive around:

01

### Compliance with Regulatory Mandates

For the cloud, responsibility grows and "burden" of security, all the time. And who's responsible in the cloud?

02

### Data Breaches

The cloud is not protected with the same level of security as on-premise. It's not. It's not. It's not.

03

### Lack of IT Expertise

The opportunity will be high as enterprises.

The IT infrastructure is changing.

and the existing data security solutions are designed to **prioritize one feature over another.**

It's either reduce security at the cost of agility, or complexity over features. Traditional models of data security as we know them, are failing to keep up in a cloud-first world.

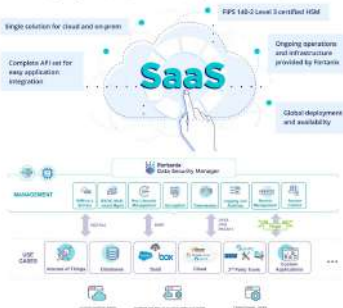

## Does this mean that the risk with cloud-first infrastructure is greater than the reward?

Not really. The answer to the modern cloud-based data security lies in a SaaS-based data security model which raises the obvious question of "Why SaaS Delivered Data Security?"

## Fortanix DSM SaaS

Built from the ground up to provide the robustness of on-prem security solutions with the agility of a cloud-delivered model. A unified platform for **Key Management (KMS), Tokenization, Encryption, and Access Management.**

If you're still sitting on the fence, here are top three reasons why you should go for the new **Fortanix Data Security Manager SaaS.**

We would love you to take the DSM SaaS for a spin

Deploy within five minutes and get it free for the first 30 days.
