

1

Online Demo

- Hosted on Odoo's cloud platform.
- Users can explore standard modules like CRM, Sales, Accounting, and Inventory.
- Users can test standard features and apps in a pre-configured environment.

2

On-Premise Demo

- Requires local installation on a server or personal computer.
- Provides full access to Odoo's backend, making it ideal for testing custom modules and configurations.
- Available in both Enterprise and Community versions.

3

Community vs. Enterprise Demo

- Community Edition (free) demo includes essential business features.
- Enterprise Edition (paid) demo includes advanced features like AI automation, Studio customization, and additional integrations.

4

Industry-Specific Demos

- Pre-configured demo environments tailored for industries like Manufacturing, Retail, eCommerce, and Services.
- Helps businesses evaluate industry-specific workflows.

5

Customized Demo

- Offered by Odoo partners and service providers like Confianz Global Inc.
- Tailored to specific business needs, demonstrating relevant modules and workflows.
- Ideal for companies wanting a hands-on preview of how Odoo can fit their operations.

Exploring Odoo 18 Demo: A First Look at the Latest Features

6

Odoo.sh Demo

- Designed for developers and businesses wanting a cloud-hosted version with customization options.
- Allows creating projects, deploying custom apps, and testing configurations.
- Includes advanced features like CI/CD, staging environments, and integrations.
